OSHIMA

用途:

- 減少在縫製過程中，由於布料受縫製整燙所產生的收縮。
- 防止做出來的衣服產生尺寸變化或變型。
- 使布料裁剪得以順利進行。
- 使襯布及面布間能緊密的結合，經預縮定型之布料，無需考慮布料裁剪、縫製、整燙後的收縮，便於生產，又提高產品之附加值。

優點:

- 可調式輸送，使布料在無張力的狀態下送入。
- 布料被蒸氣濕潤及振動器鬆弛，將使布料軟化。
- 布料經預溫區後進入烘乾區，使濕潤的布料可以在最佳溫度下乾燥。
- 採用強力吸風冷卻系統，急速冷卻布料，利用溫度差而達到定型的效果。
- 搖臂擺動將布料來回折疊，降低因卷布所產生之張力。
- 特殊的電加熱輔助裝置，可補蒸汽加熱之不足，任意調整烘乾區域之溫度。
- 裝配計米器（標準配備），可準確測量定型後布料長度。

OSP-2000III

Application:

- Reduce the fabric shrinking problems during production process.
- Keep the clothing's size and shape stable.
- Smooth the CAD / CAM clothing cutting process with precise quality control.
- To bring better effect for bonding fabric & interlining. After shrinking and forming through machine, the shrunk and formed fabrics are stable for cutting, sewing and ironing. Besides, this also increases the additional values of the products.

Feature:

- The auto sensor of feeding conveyor feeds the fabric without tension.
- Use the steam and the relaxing vibrator to soften the fabric.
- The fabrics are conveyed into the dry area through the pre-wet area so that the steamed fabrics can be dried perfectly.
- Use the powerful suction cooling system to cool the fabric quickly and then get the fabric fixed through the strong cooling.
- Use the oscillator stacker to lay the fabric keeping the relaxing tension.
- Equipped with auxiliary electrical heating device to supplement steam and adjust temperature accordingly.
- Equipped with Counter to measure the fabrics length after Shrinking and Forming.

規格 Specification

型號Model	OSP-2000	OSP-2000II	OSP-2000III
送布寬度Width	183cm/72 "		
電壓Power Supply	3P 220V/380V		
蒸氣壓力Air Pressure	0.5~0.7 Mpa	0.3~0.7 Mpa	
消耗蒸氣Steam Consumption	200kg/Hr		300kg/Hr
電熱功率Heater	-	20.4 KW	
冷卻馬達功率Cooling Motor	3.2 KW		
馬達功率Main Motor Power	0.76 KW		
皮帶速度Belt Speed	0~8M/min		
加工速度Processing Speed	4~8M/min		
機器尺寸L× W× H Dimensions(mm)	6800x2500x1600 2480x1780x1230		7500x2500x1600 2480x1980x1210
裝箱尺寸LxWxH Packing Volume(mm)	2580x2230x1730 2480x2080x1230		2580x2230x1730 2480x2130x1230
淨重 / 毛重N.W / G.W	2900/3100kg		3000/3300kg
